**Russian Doll Premium Monthly Facial Price** \$130- 75 minutes (Customized treatment includes THREE of the following add-ons: Oxygen infusion, Enzyme exfoliation, LED light therapy, Microcurrent, Microdermabrasion, Dermaplane.)

### Microdermabrasion

A quick, safe, effective form of exfoliation for all skin types and colors with no downtime and no pain or discomfort. It uses a real diamond-tipped applicator or traditional crystals with a slight suction to remove dead or damaged skin cells. Skin will appear softer, smoother, brighter, clearer,

fresher and younger looking

### Micro Current

It is used in top spas and medical offices for facial contouring, toning and firming of aging skin. Microcurrent is a low-level current that mimics the body's natural current and can provide both instant and cumulative anti-aging results. Best results are achieved when done in series of treatments.

### LED Light Therapy

LED light therapy is a pain-free, non-invasive, soothing and rejuvenating skin treatment. This treatment will help treat acne breakouts, fine lines and wrinkles, post inflammatory scarring and rosacea. It will not only help minimise acne but also soothe your skin and reduce both redness and inflammation.

### Oxygen Infusion

Promotes collagen production — The infusion of oxygen and vitamins into the skin encourages the production of collagen, which helps plump up facial features and restore volume and firmness to skin that has lost elasticity. It's also very healing and anti-inflammatory.

### RevitaPen Collagen Enhancing Treatment

This nano-technology treatment provides nutrients and stimulation to the deepest, and the very neediest, layers of your skin. RevitaPen immediately helps to improve tone, texture, balance and restores a healthy, refreshed glow to your skin. The epidermal layer of the skin is rejuvenated and the conditioned skin retains a healthy plumpness.

For extra attention to skincare needs, add on a highly advanced treatment to any of the facials:

### Dermaplane

Is a safe and highly effective physical exfoliation procedure. It requires the use of a sterile, surgical scalpel to gently "shave" the skin's surface, removing the top-most layer of dead skin along with fine, vellus hair (aka peach fuzz). Individual 30 minute treatment is \$65 As an add on to the facial \$50

### Collagen Induction Therapy

Collagen Induction Therapy with Stem Cells also known as skin needling, is a minimally-invasive skin rejuvenation treatment using an electric micro-needling wand, designed to improve the appearance of fine lines and wrinkles as well as scars on the face and body. This process allows the active ingredients to be transported deep in the skin by creating temporary micro-channels. It must be discussed and recommended by an esthetician in your treatment plan and booked accordingly. Price per treatment is \$200
